8. Feature: The good, service, or construction has the following unique features, characteristics, or capabilities:

We are in the process of determining the distribution area of a recently discovered invasive species of mosquito. This species of mosquito is a known transmitter of malaria. The specific traps being purchased are considered to be the best type to attract and capture this species of mosquito. Analysis of the mosquitoes in the traps and the distribution of traps containing these mosquitoes will determine how effective eradication methods will be.

9. Essential features. How the unique features, characteristics, or capabilities are essential for the agency to accomplish its work:

11. Alternate source. The following other possible sources for the good, service, or construction were investigated but do not meet our needs because:

BioQuip Products is the only company in the U.S. that supplies the BG mosquito traps. There are two other companies, but they are located in South Wales and Germany. The immediate acquisition of these traps is paramount in determining the distribution area of this mosquito and the success or failure of eradication of this vector which poses a serious threat to public health and safety.

We plan to use the CDC West Nile Virus funds. It is essential that we receive approval to purchase these traps during this 2nd quarter as the funds will lapse on December 31, 2010.
